Profile Summary

Computer Science graduate driven by curiosity and creativity, with a strong track record of turning ideas into real, meaningful products. Passionate about solving problems that matter and growing through collaboration, innovation, and impact.

Education

BSc. Computer Science	Nov 2021– May 2025
University of Engineering and Technology	Lahore, PK
- CGPA: 3.3/4.0	

Experience

Full Stack Development - Job	July 2024– Jan 2026
Ex-Employed – DevArtitect	Lahore, PK
– Developed and delivered scalable full-stack web applications using modern technologies (React, Node.js, and relational databases), focusing on performance, clean architecture, and user-centric design.	
– Built and integrated RESTful APIs, optimized backend services and databases, and collaborated with teams to implement secure, efficient, and feature-rich solutions for client projects.	
Freelance Full Stack Development	July 2025– Present
Self-Employed – Fiverr	
– Delivered full-stack projects using Django, React, Node.js, PHP, Mongodb, MySQL and PostgreSQL, achieving 95%+ client satisfaction.	
– Integrated third-party APIs into client platforms, enhancing functionality and reducing development time	

Projects

LogiScout - AI Powered Incident Resolution Detection

- Architected an AI-powered log intelligence platform to enable real-time incident analysis and faster root-cause detection.
- Developed structured logging libraries (Python & Node.js) with request-level correlation.
- Built a fault-tolerant Kafka-based ingestion pipeline with a cost-efficient RAG system using logs and GitHub data.
- Led development of a full-stack web dashboard for monitoring, insights, and incident management.

Work Nexus (Mongodb, React, Js., Tailwind CSS, Jira)

- Developed key frontend modules (employee management, leave dashboard, analytics) for an HR & Payroll system.
- Integrated APIs for real-time data and built a responsive, user-friendly UI.
- Collaborated in a 4-member Agile team to deliver features on time and maintain code quality.

Ecommerce App (Mongodb, React, Js., Tailwind CSS, Jira, Gen-Ai)

- Built a full-stack eCommerce application using the MERN stack (MongoDB, Express.js, React, Node.js).
- Implemented core features including authentication, product management, cart, and order processing.
- Developed a dynamic frontend with React and integrated MongoDB for efficient data handling.

Technical Skills

- Languages: Python, JavaScript, SQL, C++, C#, HTML, CSS
- Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Django, FastAPI, Tailwind CSS
- Tools: Git, GitHub, Docker, GitHub Actions, Postman, Linux, JIRA, VS Code
- Concepts: REST APIs, Microservices Architecture, CI/CD, Role-Based Access Control (RBAC), System Design, Agile Software Development, Database Management

Non-Technical Skills

Documentation, Strategy, Communication, Collaboration, Management, Adaptability
